

Procedure:

This voucher certifies that a higher-level guarantee is provided to customs authorities over the limit provided by the TIR Carnet only when both the voucher and the TIR Carnet are used together. For more information, please see <https://tircustomsportal.iru.org/>

Validation procedure:

Step 1: Voucher validation: To be valid, the “TIR+” voucher number must be registered on www.tirplus.net together with a valid accompanied TIR Carnet number. This registration definitively links the “TIR+” voucher number to the TIR Carnet number in the IRU database and confirms the validity of the higher-level guarantee.

Step 2: Voucher validity control: Customs must enter the TIR Carnet number on <https://tircustomsportal.iru.org/> and verify that this “TIR+” voucher is effectively linked to that Carnet. The TIR Carnet number and the voucher number mentioned in TIR Customs Portal confirm the validity of the higher-level guarantee for the related Carnet.

Step 3: Customs may optionally stamp the “TIR+” voucher below. Customs shall return the “TIR+” voucher together with the TIR Carnet to the TIR Carnet holder.
